PROFESSIONAL SUMMARY

IT professional with hands-on expertise in cloud infrastructure, enterprise networking, and technical support — backed by CCNA, RHCSA, and AWS certifications, a full-stack AWS deployment spanning 14+ services, and 5+ years of IT support and administrative experience.

WORK EXPERIENCE

Admin Executive & IT Support - Omtech Computer Education Kalyan, India	2019 – 2024
- Supervised administrative staff, designed filing/record-keeping systems, and assigned/monitored tasks — the project-coordination discipline later applied to multi-device network builds. - Created and maintained personnel, financial, and operational records; prepared reports for management. Taught MS Office, Tally ERP Prime (GST), and Advanced Excel. - Provided technical support for desktops, laptops, printers, scanners, and peripheral devices; diagnosed and troubleshooted hardware and software issues. - Installed, configured, and maintained operating systems and standard applications; performed system upgrades, software patches, and preventive maintenance. - Troubleshooted basic LAN and Wi-Fi connectivity issues, and set up and supported network connections for end users. - Configured and managed user accounts and access permissions; assisted users with login issues, password resets, and access-related problems — ensuring timely technical assistance and smooth day-to-day IT operations.	

PROJECTS

Scalable AWS Web Application AWS — VPC, EC2, RDS, Lambda, CloudFront, IaC	github.com/rohansonkar1206/aws-web
- Designed and deployed a scalable, secure blog application — custom VPC networking, load-balanced EC2 with EBS, and a decoupled RDS MySQL database. - Built event-driven automation with Lambda (S3-triggered image resize), SNS (notifications), and SQS (task queueing); delivered via CloudFront and Route 53, secured with WAF and KMS, monitored with CloudWatch. - Provisioned infrastructure as code with CloudFormation, deployed via the AWS CLI, for repeatable, version-controlled deployment.	
RHEL Administration Lab RHEL 7/8/9, SELinux, LVM, FirewallD, SystemD	github.com/rohansonkar1206/rhel-admin-lab
- Installed and configured RHEL servers, managing users, groups, and permissions with LVM-based storage; configured SELinux (enforcing mode) and FirewallD to harden system access. - Automated administrative tasks with Bash and SystemD; built a home lab covering 20+ real-world scenarios and practiced root-cause analysis using journalctl, rsyslog, and nmcli.	
Enterprise Network Design Cisco Packet Tracer	github.com/rohansonkar1206/network-design
Designed a multi-router, multi-switch enterprise network on a three-tier architecture — VLANs, inter-VLAN routing, OSPF (Area 0 across 5 routers) for dynamic routing and automatic failover, DHCP, NAT, and Standard/Extended ACLs enforcing least-privilege access across three departments — verified via Cisco IOS show commands and ping/traceroute testing.	

CERTIFICATIONS

Amazon Web Services (AWS) — NETTECH India	2026
Cisco Certified Network Associate (CCNA) — NETTECH India	2026
Red Hat Certified System Administrator (RHCSA) — NETTECH India	2026
Diploma in Hardware Networking — OMTECH EDUCATION	2016

TECHNICAL SKILLS

Cloud (AWS): EC2, S3, RDS, ALB, Lambda, VPC, SNS, SQS, CloudFront, Route 53, WAF, KMS, CloudWatch, CloudFormation, IAM, AWS CLI
Systems Administration: RHEL, LVM, SELinux, FirewallD, SystemD, Bash Scripting, Sudo, ACLs, File Permissions
Networking: TCP/IP, IPv4/IPv6, Subnetting (VLSM/CIDR), OSPF, DHCP, DNS, NAT/PAT, SSH, STP, VTP, VLANs, Trunking, ACLs
Tools: Cisco Packet Tracer, PuTTY, Wireshark, VirtualBox/VMware, MS Excel/Word

EDUCATION

MBA (Finance) — Yashwantrao Chavan Maharashtra Open University 8.73 CGPA (A+)	July, 2025
M.Com — IDOL Distance Education 71.75%	July, 2021
B. Com — R.K.T. College, Ulhasnagar 7.00 CGPA	March, 2018
